## **EXAMINER'S AMENDMENT/COMMENTS**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims 1, 10 and 14 recite, inter alia, a method and apparatus for controlling the data transmission performed by a memory controller including first, second, fourth and fifth ports receiving and transmitting N-bit data values and a third port which receives and transmits 2N-bit data values; wherein during a first operation, two N-bit data values are simultaneously fetched from memory devices via to the first and second ports via the first port respectively and the two fetched N-bit data values are combined into a 2N-bit data value and transmitted to the third port in response to a command signal and address input from the third port; and wherein during a second operation, the N-bit data value fetched from one of the corresponding memory devices is transmitted to the fourth or fifth port in response to a command signal and address input from the corresponding fourth or fifth port.

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
